## **DETAILED ACTION**

### ***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

- **Missing signatures for three inventors (Huang, Thompson, & Ryan).**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 37 is rejected under 35 U.S.C. 102(b) as being anticipated by Eckels (US Patent No. 6,029,458). Eckels discloses a magnetic resonance imager system comprising: a cooling coil cryocooler (10), a magnetic superconducting shield sleeve (20) surrounding a portion of a rare-earth displacer for lowering or elimination of eddy currents in various metallic structures.

### ***Allowable Subject Matter***

**Claims 1-36 are allowed over the prior art of record.**

Claims 38-46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
